Team Champions

Phuc Lam Vo - n11912839

Duy Ly - n12409880

Liam Korver - n12360155

Daniel Fitton - n10219536

**the university
for the real world[®]**

Problem, Users, and Purpose

Problem

Personal growth goals are difficult to turn into consistent actions

Users

Students, young professionals seeking structured and personalised growth

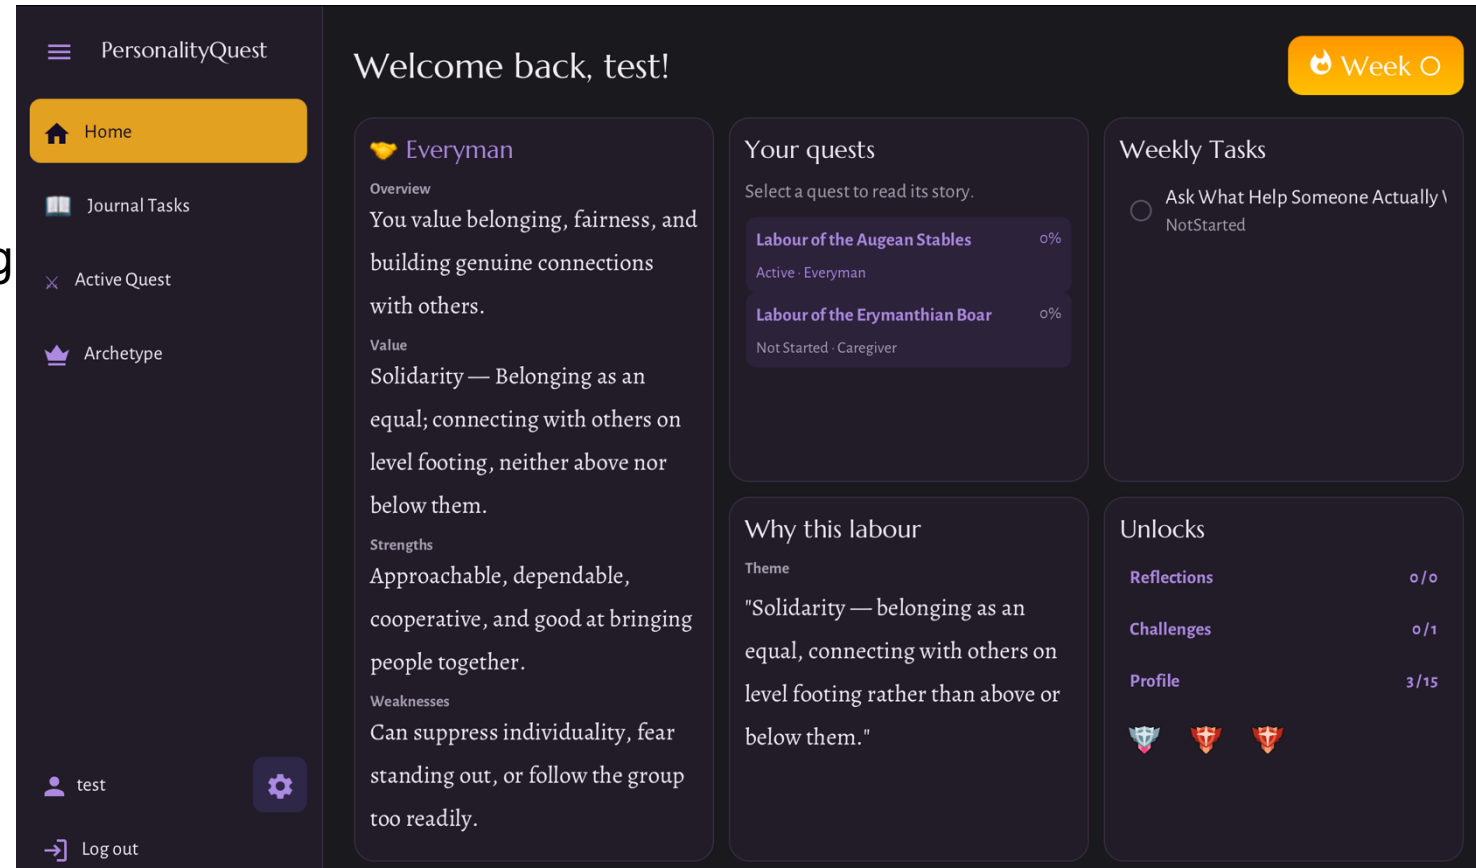

Opportunity

A gap exists in current tools for personalised, reflective growth

Purpose

Transforms personal growth into manageable, personalised quests

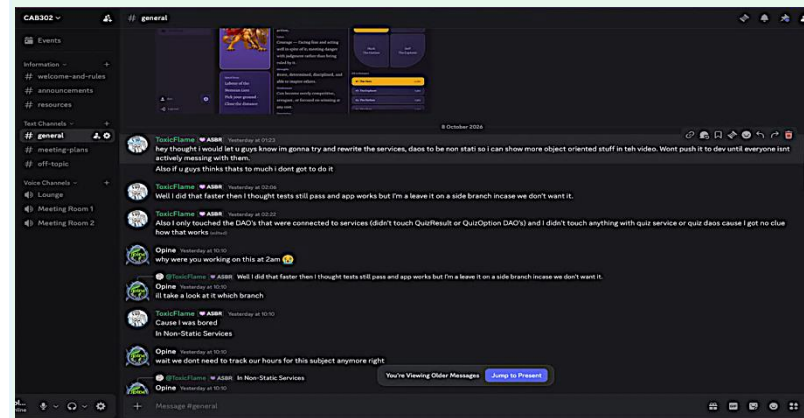

How We Worked as a Team

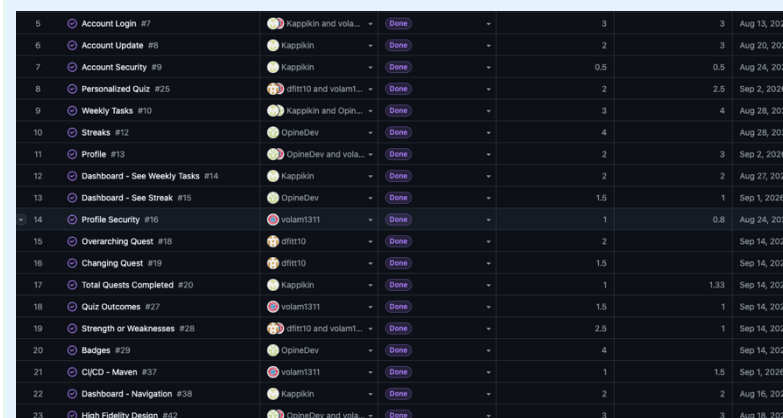

Communication & Collaboration

Weekly meetings, quick discussion, updates, share progress

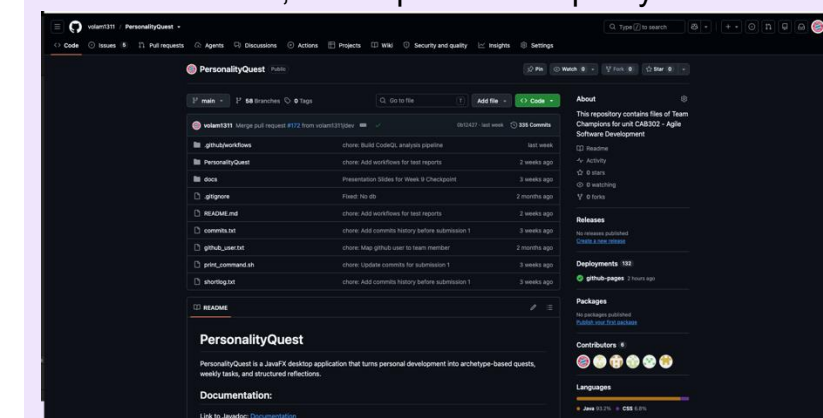

Coordination & Ownership

Visible priorities, ownership, deadlines, and progress of tasks

Development & Integration

Parallel development, review code, give feedback, and improve code quality

How it evolves

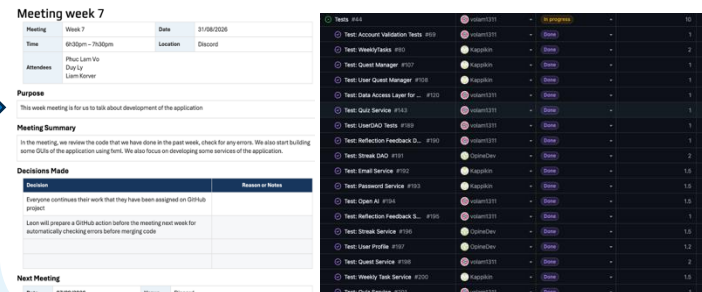

Initial user stories

MoSCoW frameworks for prioritisation

ID	User Story	Priority	Author	Acceptance Criteria
1	As a User, I want to log into my account so that I can access the application	Must-have	Leon	Given valid credentials, when submitted, then user is authenticated and taken to the dashboard; invalid credentials show an error and no session is created.
2	As a User, I want to register an account so that I can do the onboarding quiz	Must-have	Leon	Given valid required fields, when submitted, then account is created and user proceeds to onboarding quiz; duplicate/missing fields show validation errors.
3	As a User, I want to do the onboarding quiz so that I can get my archetype	Must-have	Leon	Given the quiz is started, when all questions are answered, then responses are saved and quiz is marked complete; exiting mid-quiz allows resuming later.
4	As a User, I want to be assigned an archetype based on my quiz answers so that I can understand what type of experience I get	Must-have	Leon	Given a completed quiz, when scored, then exactly one archetype is assigned and shown on the user's profile.
5	As a User, I want to set a personal goal, so my journey feels relevant to what I want	Must-have	Leon	Given a user post-onboarding, when they enter a goal, then it is saved and displayed on the dashboard; user can skip and set it later.

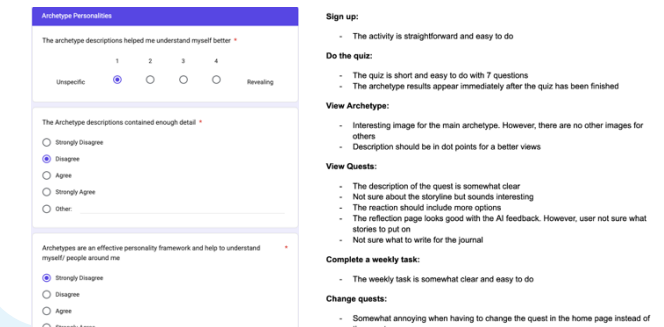

Weekly refinement

Weekly meeting and split tasks

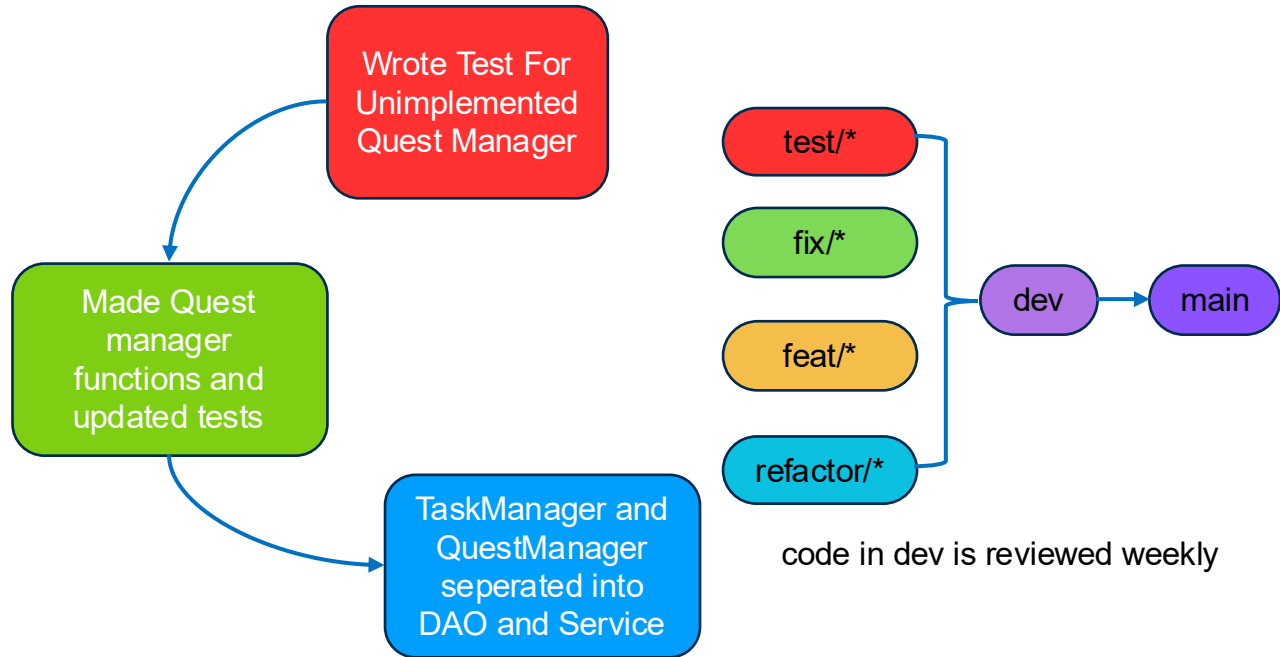

User feedback

Get user feedback and apply changes

Development Approach

Test-Driven Development

Values

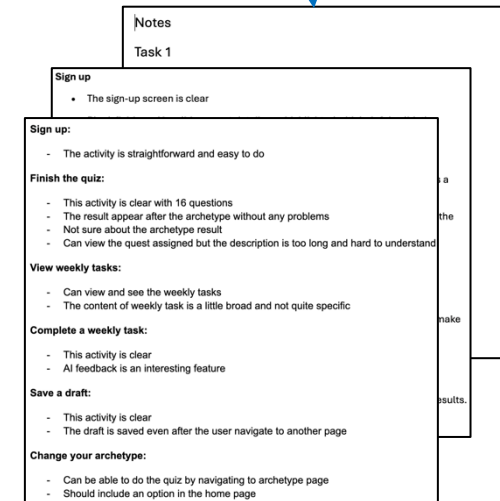

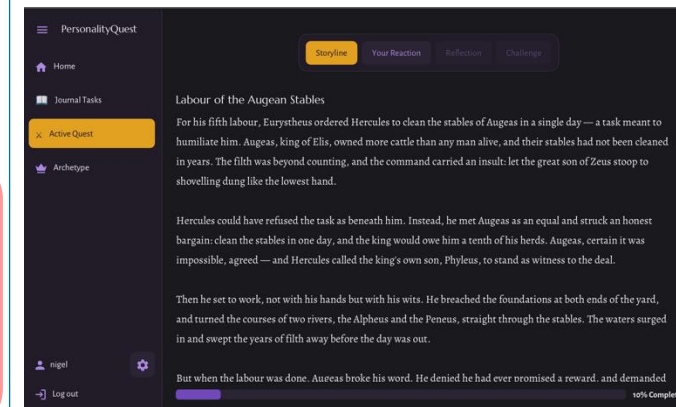

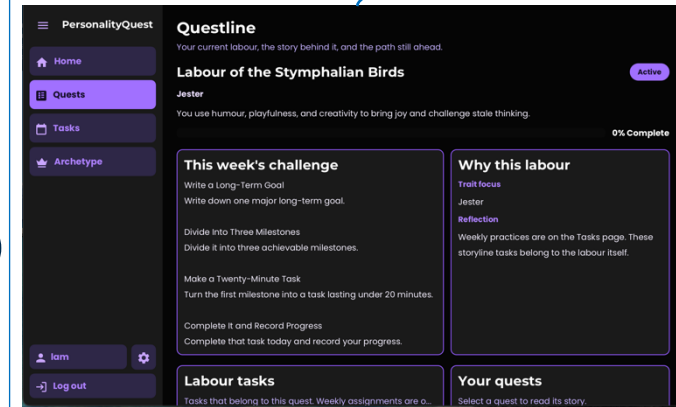

- Early feedback on application behavior
- Supports refactoring by checking behavior

TEQSA Provider ID PRV12079 Australian University | CRICOS No.00213.J

Limitations

- Requires upfront efforts to write tests
- Tests need maintainance as requirements change

Human-centred iteration

Key Technical Decisions

JavaFX

Desktop Interface

Fits our Java project and supports interactive user interface

Trade-off

Requires installation and desktop access only

SQLite

Continuity

Preserve quests, reflections, and progress between sessions

Trade-off

Requires consistent data handling and database testing

OpenAI API

Personalisation

Tailors feedback based on challenges and user's reflections

Trade-off

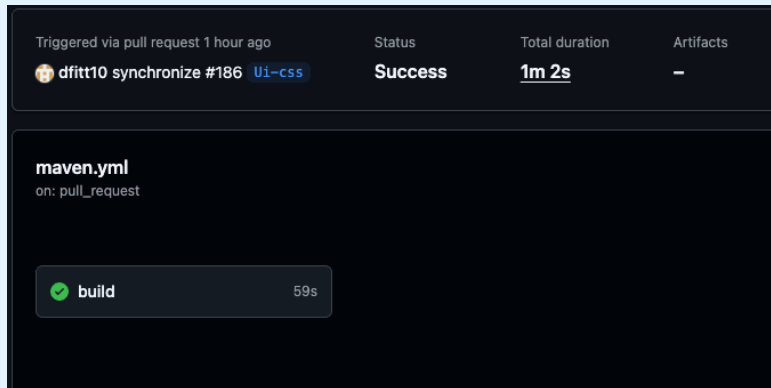

API costs money and depends on internet

Quality Across the System

Quality means **reliable software**, **effective documentation** and **intuitive interaction** that meets users' needs.

Reliable software

Maven CI and CodeQL provides automated feedback

Triggered via pull request 1 hour ago

Status: Success

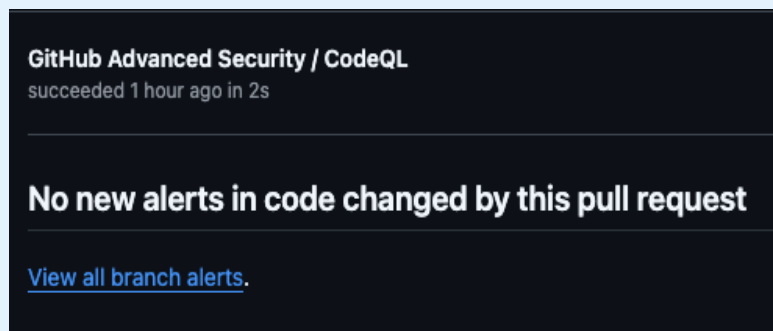

Total duration: 1m 2s

Artifacts: -

dfitt10 synchronize #186 [UI-css](#)

maven.yml
on: pull_request

build 59s

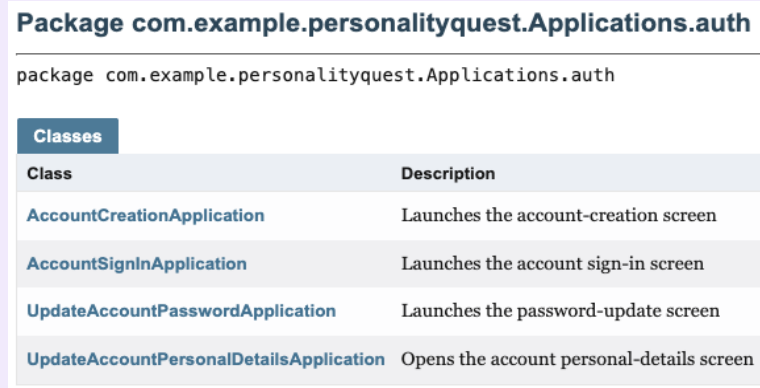

GitHub Advanced Security / CodeQL
succeeded 1 hour ago in 2s

No new alerts in code changed by this pull request

[View all branch alerts.](#)

Effective Documentation

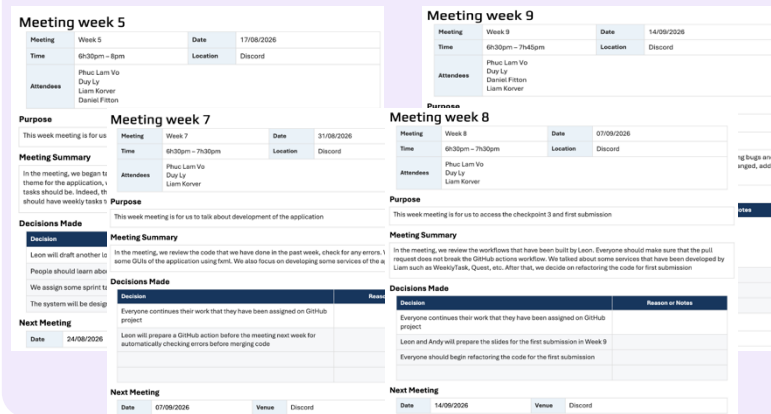

Clear documentation supports shared understanding and future maintenance

Package `com.example.personalityquest.Applications.auth`

package `com.example.personalityquest.Applications.auth`

Class	Description
<code>AccountCreationApplication</code>	Launches the account-creation screen
<code>AccountSignInApplication</code>	Launches the account sign-in screen
<code>UpdateAccountPasswordApplication</code>	Launches the password-update screen
<code>UpdateAccountPersonalDetailsApplication</code>	Opens the account personal-details screen

Meeting week 5

Meeting	Week 5	Date	17/08/2026
Time	6:30pm - 8pm	Location	Discord
Attendees	Phuc Lam Vo, Duy Ly, Liam Korver, Daniel Fitton		

Purpose: This week meeting is for us to talk about development of the application

Meeting Summary: In the meeting, we begin to theme for the application, tasks should be, indeed, we should have weekly tasks

Decisions Made: Leon will draft another is

Next Meeting: 24/08/2026

Meeting week 7

Meeting	Week 7	Date	31/08/2026
Time	6:30pm - 7:30pm	Location	Discord
Attendees	Phuc Lam Vo, Duy Ly, Liam Korver		

Purpose: This week meeting is for us to access the checkpoint 3 and first submission

Meeting Summary: In the meeting, we review the code that we have done in the past week, check for any errors, request does not break the GitHub actions workflow. We talked about some services that have been developed by Liam such as WeeklyTask, Quest, etc. After that, we decide on refactoring the code for first submission

Decisions Made: Everyone continues their work that they have been assigned on GitHub project

Next Meeting: 07/09/2026

Meeting week 8

Meeting	Week 8	Date	07/09/2026
Time	6:30pm - 7:30pm	Location	Discord
Attendees	Phuc Lam Vo, Duy Ly, Liam Korver		

Purpose: This week meeting is for us to access the checkpoint 3 and first submission

Meeting Summary: In the meeting, we review the workflows that have been built by Leon. Everyone should make sure that the pull request does not break the GitHub actions workflow. We talked about some services that have been developed by Liam such as WeeklyTask, Quest, etc. After that, we decide on refactoring the code for first submission

Decisions Made: Everyone continues their work that they have been assigned on GitHub project

Next Meeting: 14/09/2026

Meeting week 9

Meeting	Week 9	Date	14/09/2026
Time	6:30pm - 7:45pm	Location	Discord
Attendees	Phuc Lam Vo, Duy Ly, Daniel Fitton, Liam Korver		

Purpose: This week meeting is for us to access the checkpoint 3 and first submission

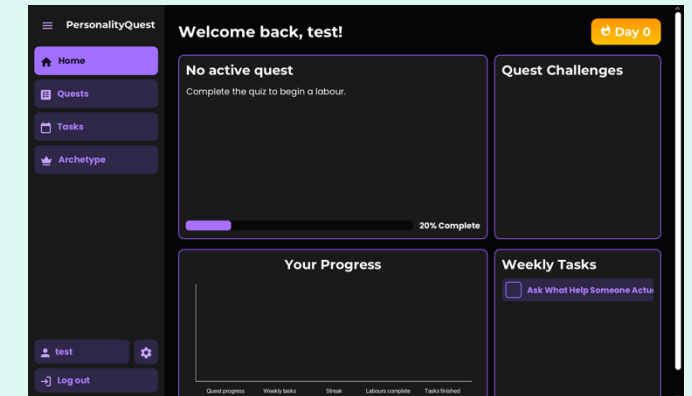

Meeting Summary: In the meeting, we review the workflows that have been built by Leon. Everyone should make sure that the pull request does not break the GitHub actions workflow. We talked about some services that have been developed by Liam such as WeeklyTask, Quest, etc. After that, we decide on refactoring the code for first submission

Decisions Made: Everyone continues their work that they have been assigned on GitHub project

Next Meeting: 21/09/2026

Intuitive Interaction

User Interface is developed based on feedback from users

PersonalityQuest

Welcome back, test!

Home, Quests, Tasks, Archetype

No active quest

Complete the quiz to begin a labour.

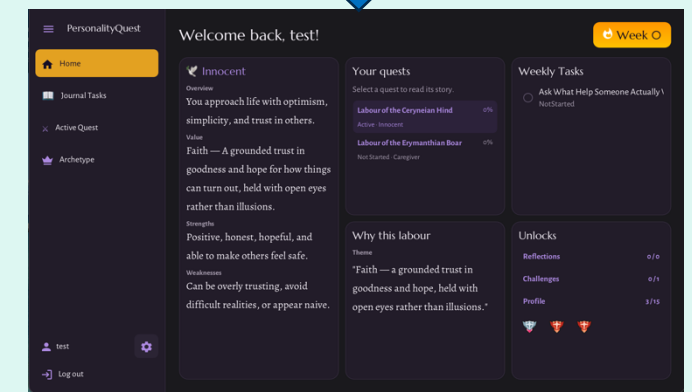

20% Complete

Quest Challenges

Your Progress

Weekly Tasks

Ask What Help Someone Actually

PersonalityQuest

Welcome back, test!

Home, Journal Tasks, Active Quest, Archetype

Innocent

You approach life with optimism, simplicity, and trust in others.

Value: Faith — A grounded trust in goodness and hope for how things can turn out, held with open eyes rather than illusions.

Strengths: Positive, honest, hopeful, and able to make others feel safe.

Weaknesses: Can be overly trusting, avoid difficult realities, or appear naive.

Your quests

Select a quest to read its story.

Labour of the Cerynethian Hind

Labour of the Erymanthian Boar

Weekly Tasks

Ask What Help Someone Actually

Unlocks

Reflections, Challenges, Profile

Key Lessons and Professional Insights

Ownership needs communication

Worked well

There is clear task ownership by using GitHub Projects

Challenge

Progress of the application depends on regular updates

Future

Agree on update routines and raise concerns early

TDD is hard to coordinate

Worked well

TDD clarifies the behavior of the application

Challenge

We need test maintenance for any changes

Future

Combine critical tests with user evaluation

Feedback needs follow-through

Worked well

Feedback informs changes in the application to improve usability

Challenge

Changes need further evaluation

Future

Test earlier and reserve time to re-test for confirmation

Task Distribution

Member	Area of Contribution
Phuc Lam Vo	Implement AI feedback services; build Maven, Javadoc, and CodeQL workflows; build settings, log in, sign up pages; refactor code into domains
Liam Korver	Build log in services, sign up services, weekly tasks services, account update quest services; refactor object-oriented designs
Duy Ly	High-fidelity design, build profile page, streak services, badges; implement settings services
Daniel Fitton	Refactor UI designs; prepare the descriptions of archetypes, quest contexts
