

Meeting week 5

Meeting	Week 5	Date	17/08/2026
Time	6h30pm – 8pm	Location	Discord
Attendees	Phuc Lam Vo Duy Ly Liam Korver Daniel Fitton		

Purpose

This week meeting is for us to access checkpoint 1
--

Meeting Summary

In the meeting, we began talking about the UI mockups from Liam first low fidelity design. We decided on the color theme for the application, we also structure the quiz structure, what is its outcome. We also talk about how the tasks should be. Indeed, they should help people with their mental health problem. We also decide that the system should have weekly tasks to ensure users will be motivated to come back to the application
--

Decisions Made

Decision	Reason or Notes
Leon will draft another low fidelity design based on the discussion	
People should learn about how to use branches in GitHub	
We assign some sprint tasks to some members of our team	
The system will be designed by Leon for better view of how it flows
