

CAB302: Agile Software Development

PersonalityQuest

Turn growth into a quest

Presented By: Team Champions

THE PROBLEM

THE PROBLEM WE ARE SOLVING

People struggle to turn personal-growth goals into meaningful, consistent actions

Generic tools ignore individual personality

Large goals feel overwhelming

Progress tracking rarely encourage reflection

OUR SOLUTION

PersonalityQuest is a JavaFX desktop application that turns personal development into archetype-based quests, weekly tasks, and structured reflections

WHAT WE OFFER

Personalisation that connects user's archetype

Progress information that monitors consistency

Weekly tasks make development goal managable

Reflections help users consider what they have learned

PRODUCT / SERVICE

AGILE PLANNING - USER STORIES

ID	User Story	Priority	Author	Acceptance Criteria
1	As a User, I want to log into my account so that I can access the application	Must-have	Leon	Given valid credentials, when submitted, then user is authenticated and taken to the dashboard; invalid credentials show an error and no session is created.
2	As a User, I want to register an account so that I can do the onboarding quiz	Must-have	Leon	Given valid required fields, when submitted, then account is created and user proceeds to onboarding quiz; duplicate/missing fields show validation errors.
3	As a User, I want to do the onboarding quiz so that I can get my archetype	Must-have	Leon	Given the quiz is started, when all questions are answered, then responses are saved and quiz is marked complete; exiting mid-quiz allows resuming later.
4	As a User, I want to be assigned an archetype based on my quiz answers so that I can understand what type of experience I get	Must-have	Leon	Given a completed quiz, when scored, then exactly one archetype is assigned and shown on the user's profile.
5	As a User, I want to set a personal goal, so my journey feels relevant to what I want	Must-have	Leon	Given a user post-onboarding, when they enter a goal, then it is saved and displayed on the dashboard; user can skip and set it later.
6	As a User, I want a personalized questline, so my journey feels connected to my archetype	Must-have	Leon	Given an archetype and goal, when the questline is generated, then quests are ordered and thematically aligned to the archetype.
7	As a User, I want to receive a weekly challenge so I can make progress in small and achievable step	Must-have	Leon	Given an active user, when a new week starts, then exactly one weekly challenge is generated with a visible description and deadline.
8	As a User, I want to reflect on my tasks so I can connect my activity back to my own growth	Must-have	Leon	Given a completed task, when the reflection prompt opens, then the user's text entry is saved and timestamped against that task.
9	As a User, I want to build a streak on doing task daily, so I feel motivated to keep showing up	Must-have	Leon	Given the daily task is completed, when the day rolls over, then the streak counter increments by one and is visible on the profile.
10	As a User, I want to earn badges for	Must-	Leon	Given a quest is completed, when recorded, then

Final Presentation

Sprint Plan

24 August - 18 September

3 Weeks

22 Backlog Tasks

#	Task	Priority	Estimate	Author
1	Set up GitHub repository, GitHub Projects	High	0.5	Leon
2	Set up JavaFX project skeleton and build pipeline	High	0.25	Leon
3	Implement JDBC data access layer	High	1	Liam
4	Build Log in UI	High	1	Leon
5	Build Sign up UI	High	1	Leon
6	Implement user registration	High	1	Liam
7	Implement user log in	High	1	Liam

COLLABORATION

The Kanban board is organized into three columns: **To do** (5 tasks, 8 hours), **In progress** (5 tasks, 35 hours), and **Done** (5 tasks, 53.5 hours). Each task card includes a title, priority (High), iteration (Iteration 2), and a status icon.

Column	Task	Priority	Iteration	Hours
To do	PersonalityQuest #18 Overarching Quest	High	2	8
	PersonalityQuest #19 Changing Quest	High	1.5	
	PersonalityQuest #20 Total Quests Completed	High	1	
	PersonalityQuest #24 Database Logs	High	1	
	PersonalityQuest #28 Strength or Weaknesses	High	2.5	
In progress	PersonalityQuest #25 Personalized Quiz	High	2	35
	PersonalityQuest #12 Streaks	High	1	
	PersonalityQuest #13 Profile	High	2	
	PersonalityQuest #27 Quiz Outcomes	High	1.5	
	PersonalityQuest #29 Badges	High	1.5	
Done	PersonalityQuest #6 Account Creation	High	4	53.5
	PersonalityQuest #7 Account Login	High	3	
	PersonalityQuest #8 Account Update	High	2	
	PersonalityQuest #9 Account Security	High	0.5	
	PersonalityQuest #10 Weekly Tasks	High	3

User Stories Alignment

User Stories	Branch	Commits
S02	feat/account_validator	feat: Account validator for sign up
S13	feat/UI_Settings	feat: Develop the skeleton of Settings
S26	feat/UI_task	feat: Add route to Task page #10

Iterative development

feat: Add data access layer for User

test: Add tests for User data access

fix: Add fix for User model

Good Commit Messages

feat: Add data access layer for User

test: Add tests for User data access #120

WeeklyTaskManager Serperated into Service and DAO
